Release Note - 23.7.1

Release Version Number: 23.7.1

Release Date (DD-MMM-YYYY): 15-July-2023

Product Name: Instasafe Secure Access (ISA)

Any Release Recommendations to End User or Customers: None

Feature Enhancements Released

1. **Enhance Sub Admin ability for User Devices Approval without any other escalated access**
   Earlier only Admin had the permission for device approval. Now, device approval mail will be sent to Admin as well as all Sub Admins. All the sub admins who have "Device Edit" and "Device Read" permission can approve the user devices by logging into the Console.

2. **Generate Event Logs for Device Approve**
   Admin can see the logs for device approval and suspension activities in Events Logs under Logs & Report Section. This feature will enable the admin to get information on the device approval pending request from the console without checking the mail each time. When Admin/sub-admin approves the Device, log will be generated in the Event Logs as "Device device-name Approved".

3. **Filter Option in Event logs**
   Filter has been added to the Event Logs section so that Admin can choose the required event type from the filter.

4. **New Report : Advanced User CSV Report**
   A new Report in CSV format is available as a download option in Users Option under Users & Groups Section. This report will provide all user details with user last login time.

5. **Separate columns added in the user csv report for Device Updates**
   Two separate columns are added to the user csv report that will help the admin to understand whether the DeviceUpdate is added via the user profile or the group profile.

6. **New Reports options available in Report Subscription Option**
   Below reports are available for subscription. This feature will benefit the Admins to actively

manage the product and the end users. Admin can now be subscribed to below mentioned reports. All Subscribed Reports will be received via Email.

- Gateway Report
- User Group Report
- Device Report
- Application Service Report
- Application Group Report
- Access Rule Report
- Controller Report
- Authentication Profile Report
- Device Check Report
- Device Update Report
- Authenticator Device Report

Bugs Fixed

1. **ACL Bulk Upload Issue**

   Admin can now perform Bulk Upload of ACL from the admin console. This fix will save the admin effort spent to add the ACL one at a time.

   Severity: Low

2. **Search Functionality is not working in Sub Admin**

   Admin can now search the Sub Admins in the Sub Admin & Roles module.

   Severity: Low

3. **A user is unable to login to the console when disabled from the Sub Admin Role**

   Users will be able to log in to the console when they are disabled from the sub-admin role because their user profile is active in the console.

   Severity: Low
